

PARK WHISPERS

A fun, playful, AI-powered layer that gives small park objects voices and personalities inviting visitors to listen, laugh, and care for their surroundings.

What

- A hidden network of small park voices, like pebbles, birdhouses, leaves, or lamp posts that “speak” when scanned.
- Each object has its own personality, can be grumpy, poetic, chirpy, wise and shares fun facts, jokes, or maybe guidance.
- Visitors can discover them by scanning QR codes thereby turning the park into a conversational treasure hunt.
- Objects can hint at each other, nudging exploration and playful discovery.

Societal impact

- It encourages exploration, makes ordinary walks playful and surprising.
- Educates playfully: shares ecology, history, and etiquette through character voices.
- Scales easily, from 3 hidden objects in a park → to dozens of voices across Eindhoven.
